4448c Zero Clients for Citrix Value Class

Optimized for a Citrix published applications and lite VDI environment the 4448c Zero Client is the ideal unit for any task worker classification.

While the 4448c is our entry level Zero Client or as we like to call it our Value Class, it still has more than enough power to drive the standard dual monitor configuration as well as having the ability to run multiple published applications at the same time.
