

For all your
Point of Sale
NEEDS

ThinGlobal's MiniPC TG1

No matter what your business, ThinGlobal's MiniPC TG1 is the perfect solution for your Point of Sale (POS) area. MiniPC TG1 is the smallest, most complete computer system while featuring the best cost to benefit ratio in the world. Have a POS device that is efficient, elegant and inexpensive.

The world in
your palm

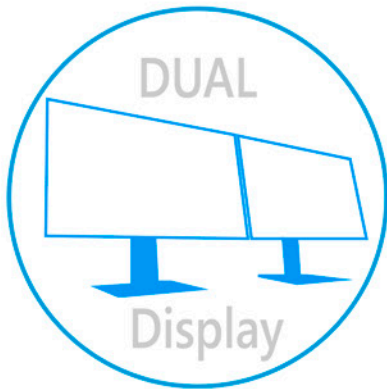

Unmatched Productivity and Cost Efficiency

ThinGlobal's MiniPC TG1 has an Intel 4-core, DDR3 memory with a bandwidth up to 10.6GB, two independent video outputs (VGA and HDMI), integrated 3D graphics processor and that is compatible with Linux, Windows 8, Windows 10, Android, and others.

Designed for Efficiency

ThinGlobal's MiniPC TG1 is Impressive

Have a screen for the seller and a separate display for your client. Not only can you show the itemized purchase, but you can also display ads.

Compatible with the latest version of Windows IoT, it also provides the best cost for this type of application.

Connect a fiscal printer (receipt printer), barcode reader and cash drawer directly to your MiniPC TG1.

Other Applications::
