

# ThinGlobal's ThinPC TG1

The perfect ThinClient for the most demanding users

The best performance

The best cost-benefit ratio

The smallest and most powerful

ThinNetworks has over 15 years of experience in producing quality products that significantly reduce the TCO of companies worldwide. Backed by this extensive experience, an affiliate of ThinNetworks, ThinGlobal has brought to market the lowest and the best thin client in the world. Excellent performance for the even most demanding user environments.

ThinGlobal's ThinPC TG1 has an Intel 4-core, DDR3 memory with a full bandwidth up to 10.6GB, two independent video outputs (VGA and HDMI), integrated 3D graphics processor and that is compatible with Linux, Windows 8, Windows 10, Android, and others.

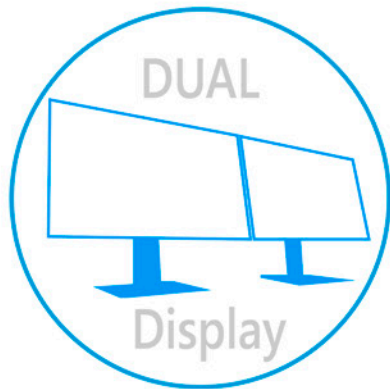

Maximum Productivity and Efficiency
