

IGEL UNIVERSAL MANAGEMENT SUITE™

SIMPLE CENTRAL ENDPOINT MANAGEMENT FOR DIVERSE ENVIRONMENTS

Universal Management Suite (UMS) is a single management solution for decentralized endpoints. Purpose-built to simplify complex enterprise environments, UMS supports diverse operating systems, databases and directories. Regardless of the scale or diversity of your environment, IGEL offers an add-on software to extend UMS functionality within one familiar and easy to use interface.

How UMS simply and centrally manages different endpoints in diverse environments.

FEATURES & BENEFITS

- 
Hardware agnostic
Remotely manage any compatible x86 device, regardless of manufacturer.
- 
Diverse operating systems
Manage IGEL OS™ and Microsoft Windows endpoints.
- 
Automated and intuitive
Automatically detect firmware updates, instantly enroll, index and control endpoints from one centralized backend system. No scripting necessary.
- 
Policy configuration
Easily set and apply policies for granular control.
- 
Click & drag profile updates
Create profiles and assign to directories.
- 
Buddy updates
Set up one thin client as the server to update other endpoints in a branch office with limited bandwidth.
- 
Easy customization
Set custom partitions and partial updates.
- 
Extend and scale
With optional add-on software adapt UMS functionality according to your business requirements.
- 
Mobile Device Management
Manage up to 5 iOS endpoints in the same way as all other IGEL endpoints

SIMPLE

easy installation,
zero-touch
deployment,
remote management

SMART

available with all IGEL
endpoints, extendable with
add-on options

SECURE

encrypted
communication, failsafe
upgrade function

TECHNICAL SPECIFICATION

SUPPORTED PLATFORMS	
UMS Server	Oracle Linux Server 7 (64-bit) Microsoft Windows Server 2008, 2008 R2, 2012, 2012 R2, 2016 (64-bit) Ubuntu 16.04, 18.04 (64-bit) Redhat 7 (64-bit)
UMS Console	Oracle Linux 7 (64 bit) Microsoft Windows 7, 8, 10, Windows Server 2008, 2008 R2, 2012, 2012 R2, 2016 (64-bit) Ubuntu 16.04, 18.04 (32-bit, 64-bit) Redhat 7 (64-bit)
Databases	Oracle 11g R2, 12c Microsoft SQL Server 2008, 2008 R2, 2012, 2014, 2016 - Cluster Support PostgreSQL Version 9.3 - 9.6 and 10.1 Apache Derby 10
COMPATIBILITY	
Supported Devices	IGEL Universal Desktop Thin Clients and IGEL Zero Clients running IGEL OS™ based on Linux 10 or Windows 10 IoT
	Any x86 device converted to IGEL OS™ with the Universal Desktop Converter
	Devices running Windows 7 or 10 with IGEL Unified Management Agent
	Devices running legacy IGEL Linux OS or Windows 7 Embedded Standard
SECURITY FEATURES	
	SSL / TLS encrypted communication
	User / password authentication
	Active directory groups can be set for access right management
	Local client certificates
	Failsafe upgrade function for a complete and reliable back up of the endpoint, even when interrupted
SUPPORTED LANGUAGES	
	English, German, French, Dutch, Spanish, Italian, Chinese (simplified and traditional)
UMS ADD-ON SOFTWARE	
	As your company expands, extend the functionality of your UMS
Mobile Device Management (MDM)	Mobile Device Management for up to 5 iOS endpoints
Asset Inventory Tracker (AIT)	Track connected USB and Bluetooth assets, collect and centrally view in the UMS
IGEL Cloud Gateway (ICG)	Endpoint Management Anytime, Anywhere
Unified Management Agent (UMA)	Manage Windows 7 and Windows 10 by UMS
High Availability (HA)	Extend UMS scalability to >500 endpoint devices
Universal Customization Builder (UCB)	Expand and adapt IGEL OS and Windows 10 IoT or WES 7 based IGEL endpoints to meet your needs
Shared Workplace (SWP)	Set user specific configurations for shared endpoint devices
SOFTWARE AND SUPPORT	
Software Updates	Regular firmware updates included
Technical Support	Comprehensive support is included
